

## Total U.S. Residents Compared to Gross State Product for the Healthcare and Social Assistance Industry (Top Ten by Healthcare Product)

Total US Residents Compared to Total HC Product  
(Top Ten by Product)

Gross State Product is a measurement of a state's output; it is the sum of value added from all industries in the state. GSP is the state counterpart to the Nation's gross domestic product (GDP). GDP is the market value of goods and services produced by labor and property in the United States, regardless of nationality. Current dollar GSP components are compensation of employees, taxes on production and imports, and gross-operating surplus.
