

Healthcare providers receive perks from HIMSS Analytics for their participation in HIMSS Analytics' Annual Study. The study collects healthcare IT information from 5,100+ healthcare providers nationwide. The de-identified aggregate information is made available to other healthcare providers that complete the study to enable and encourage collaboration as well as advance healthcare IT initiatives.

EMR Adoption Model SM	
Stage	Cumulative Capabilities
Stage 7	Medical record fully electronic; HCO able to contribute CCD as byproduct of EMR; Data warehousing in use
Stage 6	Physician documentation (structured templates), full CDSS (variance & compliance), full R-PACS
Stage 5	Closed loop medication administration
Stage 4	CPOE, CDSS (clinical protocols)
Stage 3	Clinical documentation (flow sheets), CDSS (error checking), PACS available outside Radiology
Stage 2	Clinical Data Repository, Controlled Medical Vocabulary, Clinical Decision Support System, may have Document Imaging
Stage 1	Ancillaries – Lab, Rad, Pharmacy - All Installed
Stage 0	All Three Ancillaries Not Installed

Data from HIMSS Analytics™ Database

The EMR Adoption Model score enables healthcare providers to compare their score to comparable hospitals, their state's average score and more.

Visit www.himssanalytics.org for the country's most recent EMR Adoption Model scores.

About HIMSS Analytics

HIMSS Analytics is a wholly owned not-for-profit subsidiary of the Healthcare Information and Management Systems Society (HIMSS). The company collects and analyzes healthcare information related to IT processes and environments, products, IS department composition and costs, IS department management metrics, healthcare trends and purchase-related decisions. HIMSS Analytics delivers high quality products, services and analytical expertise to healthcare delivery organizations, healthcare IT companies, state governments, financial companies, pharmaceutical companies, and consulting firms.

“HIMSS Analytics’ EMR Adoption Model presents a powerful and compelling story and has helped our management team get on the same page in our understanding of how ready we are to electronically interact with our communities.

The results have helped to validate our previous IT expenditures and shaped our strategy for future IT investments.”
